ABOUT MEDUSA MINING LIMITED

Medusa Mining Limited ("Medusa" or the "Company"), a public company listed on the ASX, AIM and the TSX, is an Australian based gold producer, focussed solely on the Philippines.

With current mineral resources comprising indicated 580,000 ounces of gold and inferred 1,310,000 ounces of gold, Medusa's corporate strategy is to become a mid-tier, 300,000 to 400,000 ounce per year, low-cost gold producer.

The Company has completed the expansion of its high grade Co-O Mine operations (indicated resources 580,000 ounces of gold inclusive of a probable reserve of 500,000 ounces of gold, and inferred resources 660,000 ounces of gold) to a production level 100,000 annualised ounces, and is currently conducting near mine exploration to assess the possibilities of further expansion to 200,000 ounces per annum. Current cash costs at the Co-O Mine are approximately US\$190 per ounce.

A pipe-line of deposits is now being established with the Bananghilig Deposit (inferred resource of 650,000 ounces of gold) recently added and which is expected to expand, potentially in conjunction with nearby discoveries.

Further potential upside exists for the discovery of substantial copper deposits within the tenement holding of more than 800 km².
