**Notes:**

- (i) Approximately 450,000 ounces already mined from the deposit;
- (ii) SG of 2.62 used for all estimates;
- (iii) Tonnes and ounces estimates rounded down to nearest 1,000; and
- (iv) Highlighted cases indicate most geologically reasonable based on current knowledge

\*\* The potential target size and grade is conceptual in nature, and there has been insufficient exploration to define a mineral resource, and it is uncertain if further exploration will result in the target being defined as a mineral resource
